What is EduAir?

EduAir for Jamaica schools. It handles student registration, staff management,and attendance tracking aligned with Jamaica's Ministry of Education(MoEYI) reporting requirements

Students

View Attendance clock in/out

Teachers

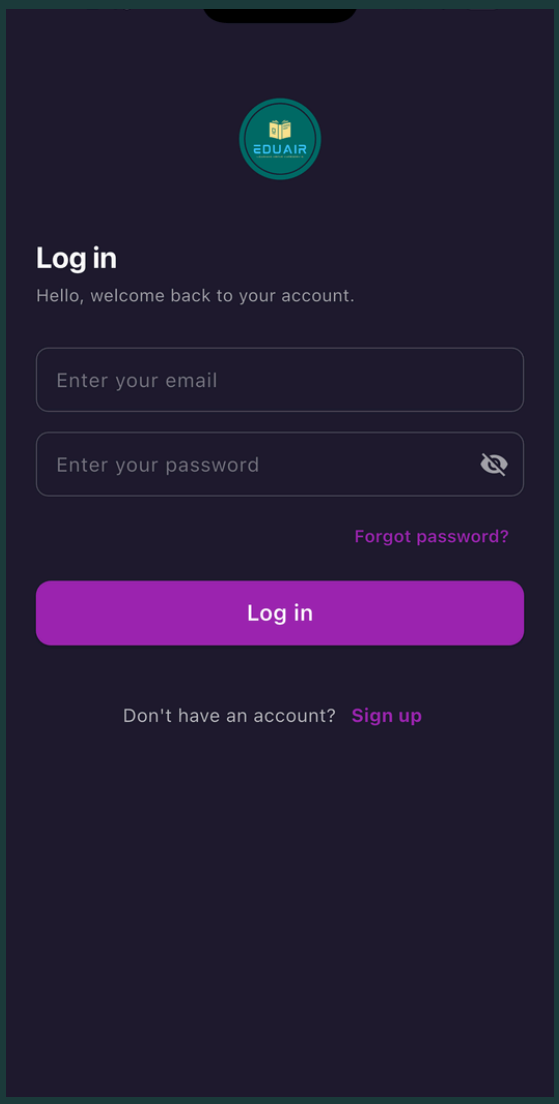
Take batch atthendace for homeroom class

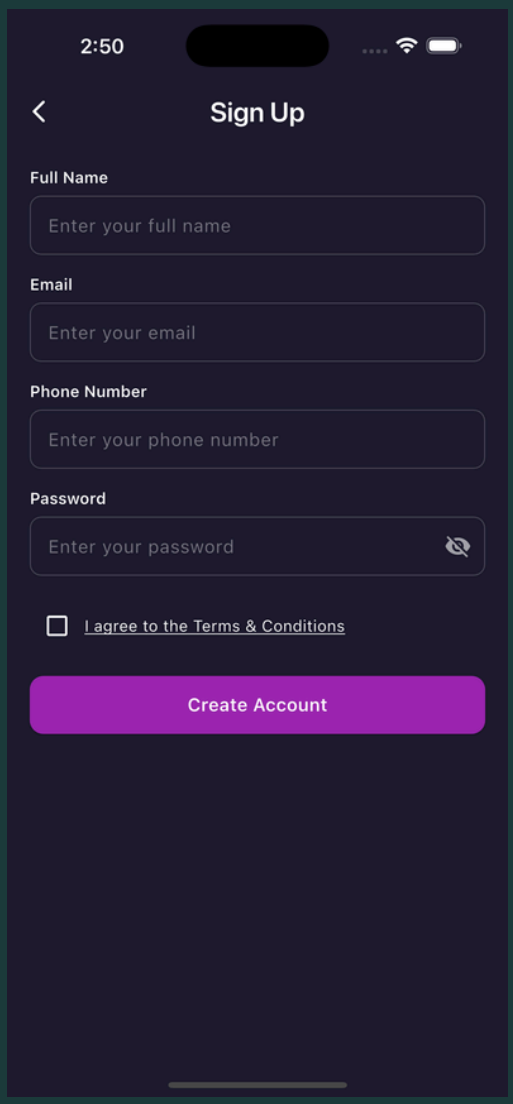
Admin

Register student and staff,manage, school

Built with Flutter • Node.js • MySQL • JWT Authentication

Authentication



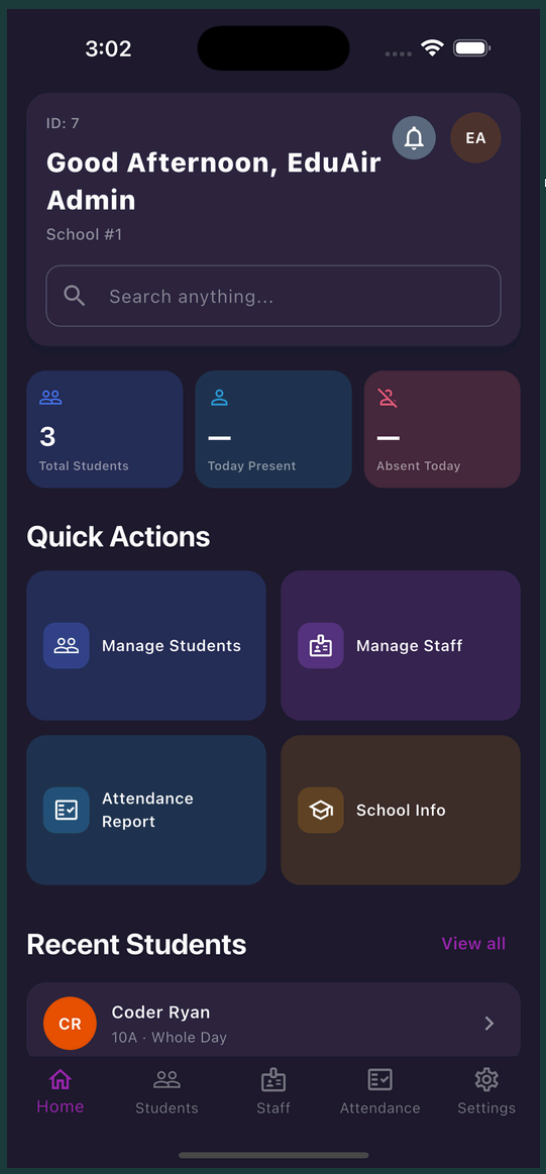


Secure Jwt login email. and password

Self -registration is disabled.Admin creates all accounts

Session persists vis flutter_sercure_storage

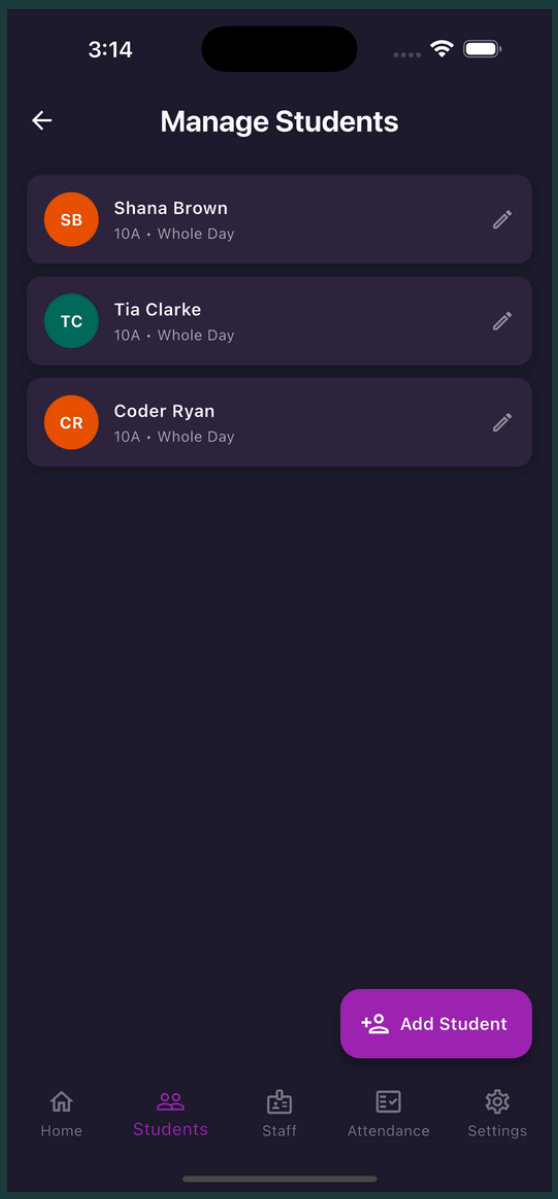
Admin Dashboard

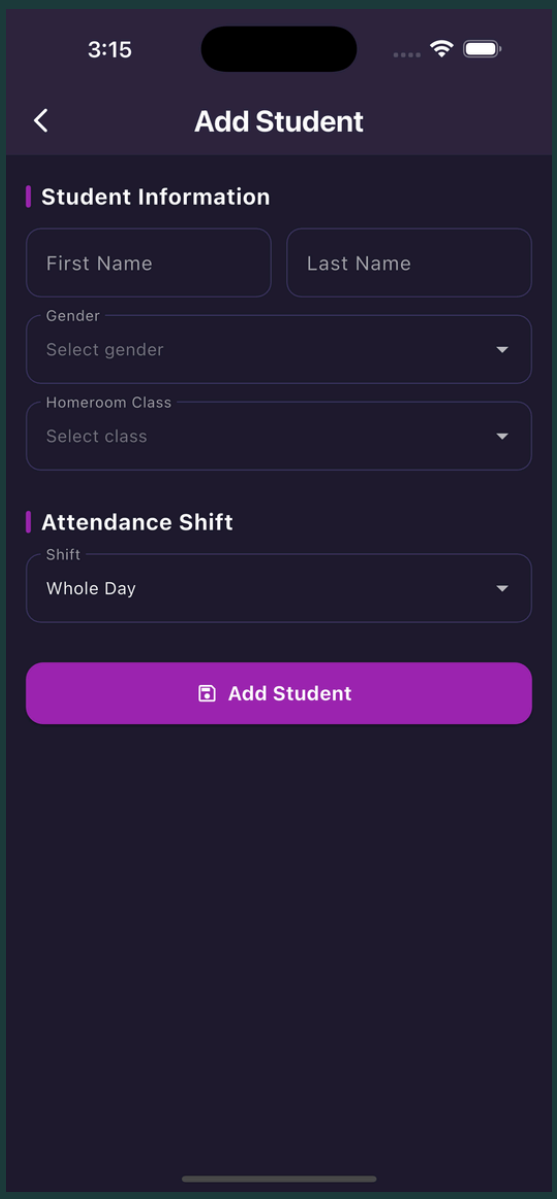


The Admin Dashboard gives a real time overview of the school.

- Total student count
- Quick action Students, Staff,
- Attendace,School Info
- Recent students list

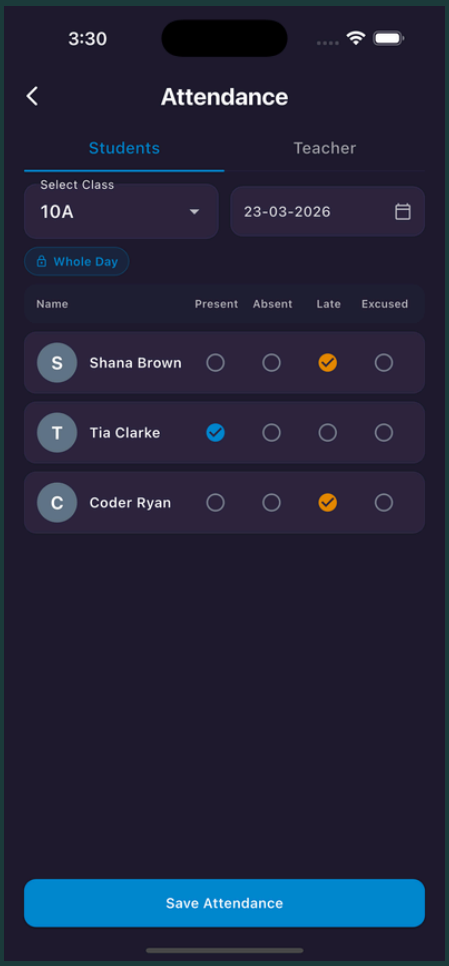
Student Management

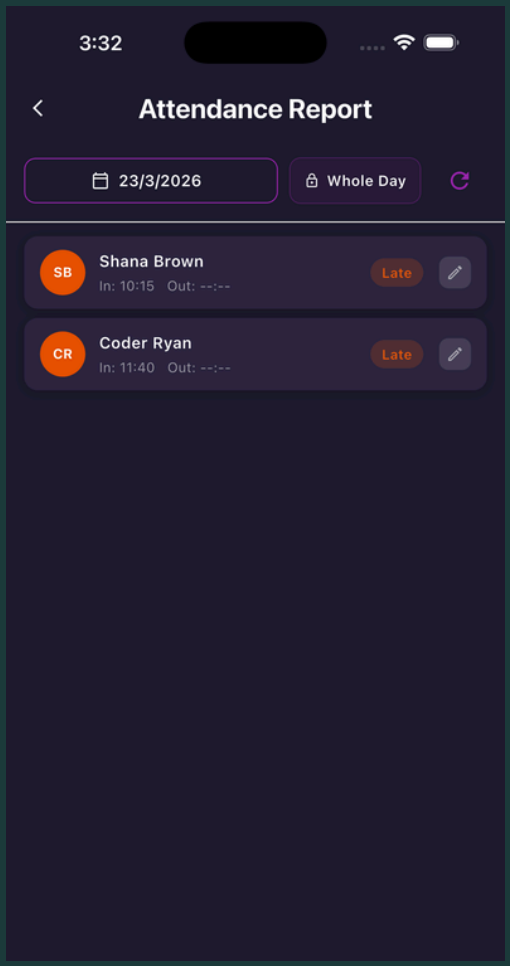




Full CRUD: Create, View, Edit, Soft Delete
Data is never permanently deleted.

Attendance Tracking



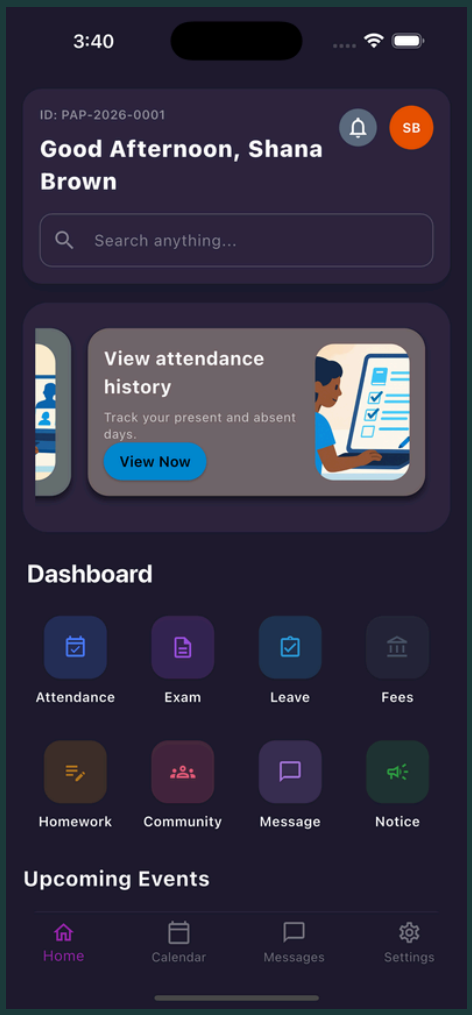


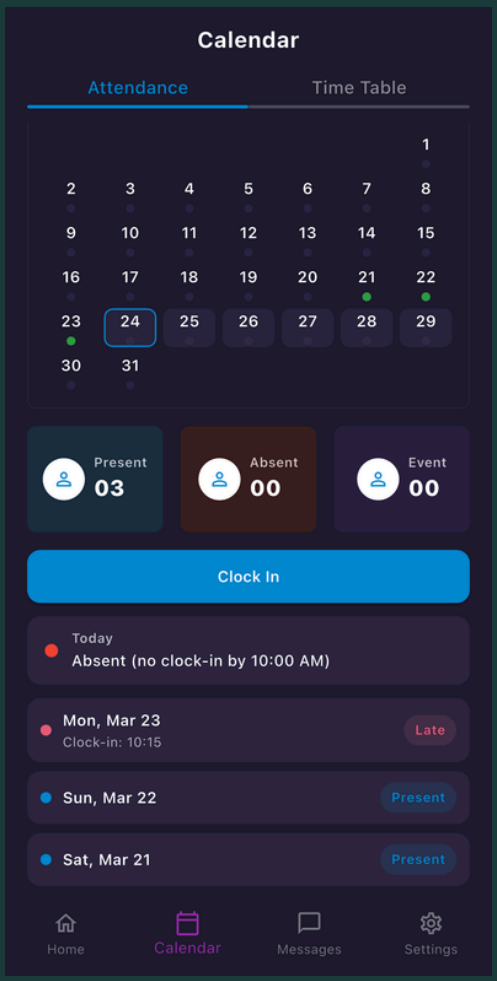
Teachers take batch attendance for their homeroom class in one session.

- **Mark each student: Present, Absent, Late, or Excused**
- **Late arrivals require a MoEYI-approved reason category**
- **Admin can view and edit all records by date and shift**

Shift types: Morning • Afternoon • Whole Day

Student Experience

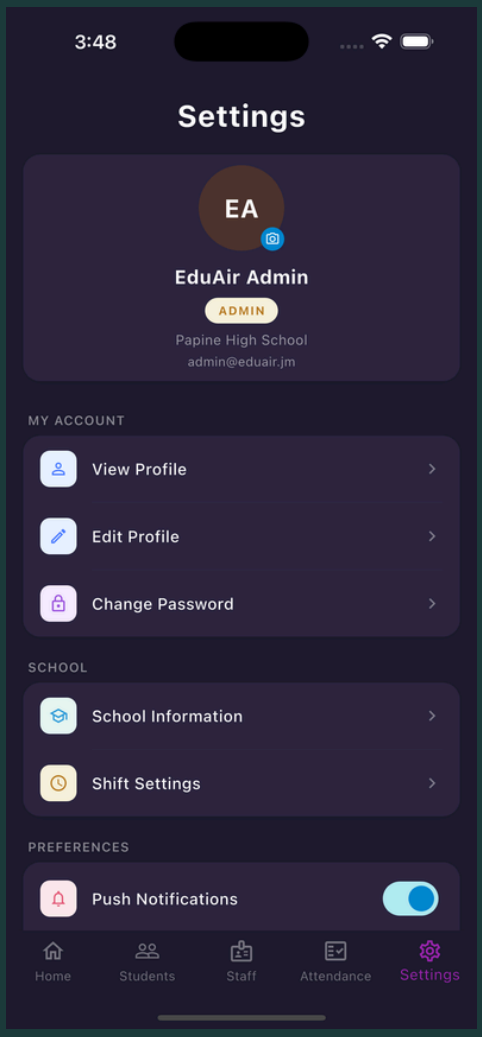


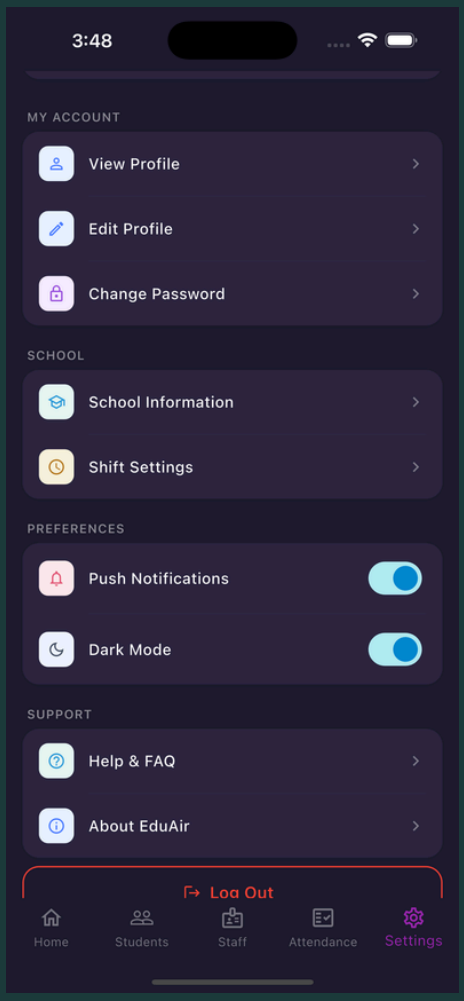


Students see their own attendance updated in real time.

- **Today's status — Present, Late, Absent or Excused**
- **Calendar view — colour coded per day**
- **Full attendance history**
- **Clock in and out from the app**

Settings & Security





Role-aware settings page — content changes based on who is logged in.

- **Edit Profile**
- **Change Password**
- **School Info (Admin only)**
- **Dark Mode toggle**
- **Push Notifications toggle**
- **Secure Logout — clears JWT token locally, no server call needed**

System Architecture

Flutter App (Mobile)

↓

Dio HTTP Client
JWT Interceptor

↓

Node.js + Express API

↓

MySQL DB

- **All API calls carry a JWT Bearer token**
- **school_id comes from the token — never from the request body**
- **Business logic lives in the domain layer**
- **UI never talks to the database directly**

Flutter • Riverpod • Node.js • Express • MySQL • JWT • bcrypt
